

# Save time and be better informed!

Help your teachers conduct better quality observations and assessments in less time with **ReallySchool...**

## Need to know

Alongside teaching and learning, the requirement to observe and assess skills acquisition for every child in the primary school class means teachers are constantly busy. For schools looking for technology to streamline this, there are some vital considerations to ensure your money is spent wisely.

To support time-poor teachers and those with low technology confidence, an intuitive solution they can use without extensive training is a great start!

Ensure you have flexibility. For example, if you're doing a group observation and another student joins in, can you record that easily? Are the items of evidence (photo, video, audio, written notes) all good quality and easily added to observations?

Besides the mechanics of observations and assessments, if your chosen solution delivers extra reports (e.g. class progress, student progress, SOAP, baseline assessments, end of KS1 and KS2 assessment, whole school attainment), these can provide valuable whole-school insights.

Parental engagement is important. Technology to nurture this, provide opportunities for them to contribute to their child's learning journey through home learning and celebrate their in-school achievements is a real bonus.

## Your next solution?

ReallySchool helps with all these things and more. It's an easy-to-use tablet app for teachers, with an online portal, where more in-depth reports and overviews are created.

Teachers can effortlessly apply assessments from the in-built list (includes all UK criteria and frameworks) and instantly check where learning gaps are – even seeing where they can be attributed to the developmental differences between Summer and Autumn-born pupils. And being able to see assessment history, mid-observation, prevents duplication of data that has already been gathered.

As for future-proofing, take this year as an example. Back in January, no-one ever envisaged children having months away from education. ReallySchool's ability for teachers to send out learning activities and communicate with parents during lockdown has proved invaluable, not just to support learning, but to maintain contact, which has meant so much these past months.

## Next Generation

Developed with teachers, for teachers, ReallySchool's latest update streamlines the end-of-year transition of children's records to the next class, allows teachers to send out home learning activities, encourages parents to contribute to their child's learning – and helps teachers to record refinements in pupils' understanding to show smaller steps of progress.

## TECH TALK

### EASY TO USE

Simple for teachers to use, ReallySchool's intuitive user interface is presented in a social media app style, so finding and accessing its tools is easy – and they tell us it can save up to two hours per day!

### ASSESSMENTS ON TAP

Staff can choose between multiple frameworks for assessment (the new EYFS 2020 curriculum has just been added), so there's no need to look up assessment points; they're built in and in front of you for each assessment.

### MONITOR PROGRESS ON THE GO

Use the quick access Class Report grid with multiple views to see the number of observations captured per assessment point for each child, to check attainment on the go.

### CELEBRATE SUCCESS

Another great addition for pupils is that there are now even more achievements badges in the library, giving teachers and parents additional opportunities to celebrate their success!
